

KISHAN KUMAR

Entry-Level Software Developer | MERN Stack & Machine Learning

Lucknow, Uttar Pradesh, India | +91 9236076711 | kishankumar13580@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience across full-stack MERN development and machine learning, gained through internships at CodeAlpha and GRAS tech. Skilled in REST API development, responsive UI design, Python-based data analysis, and Git-based version control, with several end-to-end projects delivered, including e-commerce platforms, service marketplaces, and ML data-analysis pipelines. Seeking an entry-level Software Developer role to apply strong problem-solving and collaboration skills to real-world engineering challenges.

TECHNICAL SKILLS

Programming Languages: Java, C, Python, JavaScript, HTML5, CSS3

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

Frameworks & Libraries: React.js, Node.js, Express.js, Vite, Tailwind CSS

Machine Learning & Data Analysis: Python (NumPy, Pandas, Matplotlib, Seaborn), Exploratory Data Analysis (EDA), Data Preprocessing, Statistical Analysis

Databases: MongoDB, NoSQL

Tools & Platforms: Git, GitHub, REST APIs, JWT Authentication, localStorage

Methodologies: SDLC, Agile/Scrum (sprint-based team collaboration)

Core Competencies: Teamwork & Collaboration, Communication, Problem Solving, Leadership, Team Management

Languages: English, Hindi

EXPERIENCE

Machine Learning Intern — GRAS tech

Jun 2026 - Aug 2026

On-Campus - Organized by Babu Banarasi Das University, Lucknow

- Completed a 90-hour Project-Based Summer Training Program on Machine Learning (Using Python), conducted by GRAS tech, spanning 3 core modules: Python for ML, Statistics & Math for ML, and Data Preprocessing & EDA.
- Engineered data-cleaning and exploratory data analysis (EDA) workflows in Python using NumPy and Pandas, applying visualization techniques with Matplotlib and Seaborn on real-world datasets.
- Applied 5 core statistical techniques (mean/median/mode, variance & standard deviation, probability, correlation & covariance, and normal distribution analysis) to interpret dataset patterns and support feature engineering decisions.
- Performed data preprocessing covering 4 key techniques: missing-value handling, categorical encoding, feature scaling (normalization/standardization), and outlier detection, to prepare datasets for downstream modeling.

Full Stack Development Intern — CodeAlpha

May 2026 - Jun 2026

Remote

- Constructed a full-stack e-commerce storefront (Simple E-Commerce Store) using Node.js, Express.js, and MongoDB, developing a RESTful API to manage the product catalog, shopping cart, and order workflow.
- Implemented 4 core features: category-based product filtering, a persistent shopping cart with localStorage, free-shipping logic, and a complete checkout flow with order creation.
- Designed a responsive, dark-themed glassmorphism UI, improving visual consistency and usability across desktop and mobile breakpoints.
- Earned an official Full Stack Development Internship Completion Certificate issued by CodeAlpha (June 2026).

PROJECTS

ServiceHub - Neighborhood Service Marketplace (Hackathon)

2026

- Developed a full-stack MERN marketplace connecting homeowners with verified local service providers, featuring JWT-based authentication and role-based dashboards for 2 user types: customers and providers.
- Architected a responsive React and TypeScript frontend with Tailwind CSS and dark-mode support, backed by a Node.js, Express.js, and MongoDB REST API spanning 3 core modules: services, bookings, and reviews.
- Collaborated in a 4-member team using Git for version control to deliver real-time booking management within a hackathon timeline.

BlogSphere - Full-Stack Blogging Platform

2026

- Created a full-stack MERN blogging platform with JWT-based authentication, a rich-text editor for article creation, and a dark-mode responsive UI with glass-panel styling.
- Added a 4-part engagement system spanning post liking, bookmarking, commenting, and tag-based filtering, plus real-time search across articles.

CodeAlpha Social Media Platform

2026

- Delivered a full-stack social media platform (CodeAlpha internship) with Node.js, Express.js, and MongoDB, supporting user profiles, posts, and comments.
- Introduced a like/follow interaction system with secure user authentication, enabling social engagement between registered users.

CERTIFICATIONS

Full Stack Development Internship Certificate - CodeAlpha (June 2026)

Machine Learning (Python) Training Certificate - GRAS tech, Cert. No. GRAS/PBT/ML/069 (Aug 2026)

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Pursuing

Babu Banarasi Das University, Lucknow, Uttar Pradesh

Intermediate (Class XII), U.P. Board — H.R.I.C. Khalilabad, Sant Kabir Nagar, U.P. — 74% 2022

High School (Class X), U.P. Board — Kisan Inter College, Sant Kabir Nagar, U.P. — 80% 2020
